Dec 3, 2009 - For immediate release

David Mester takes over GM role at ViVitro Labs

ViVitro Labs Inc. is very pleased to announce that David Mester has accepted the role of General Manager effective immediately.

With over 20 years of experience in the cardiovascular industry David brings with him a wealth of prosthetic heart valve testing, manufacturing and quality standard experience. David ran the valve testing lab at well respected industry player CarboMedics and personally oversaw the testing of thousands of valves for materials properties, durability and hydrodynamics. He also prepared a large number of submissions for the FDA and other regulatory bodies in accordance with FDA and ISO5840 standards. He has recently been invited to provide input to the ISO5840 working group. David holds a degree from St. Edwards University in Austin.

“I am honoured to be the new General Manager of ViVitro Labs. I have spent the past 20 years working with ViVitro equipment and have a profound respect for the company and its products. Now that ViVitro is a member of the StarFish Group I believe that we have the foundation in place to reinvigorate the product line and dramatically expand our lab testing service.” David Mester, General Manager, ViVitro Labs.

“We are delighted to have attracted a candidate of David’s stature to ViVitro”, said Scott Phillips, president of the StarFish Group. “With this key hire in place we believe that ViVitro Labs can support the industry with the tools to enable the success of the next generation of prosthetic heart valves.”

About ViVitro Labs

ViVitro Labs Inc. offers industry leading prosthetic heart valve test equipment and related testing and consulting services.

ViVitro is a known and trusted source of quality products and services providing 25 years of service assisting its clients to complete successful testing and regulatory quality compliance.

Our vision is to empower our clients to complete world-leading research, develop high quality, innovative products and enable them to demonstrate regulatory compliance and manufacture them reliably. ViVitro Labs handles custom product configuration and services for many of its clients.
